

The moment of trust. The steel tubing specs were demanding. The order's gone through melting, piercing, elongating and straightening. They're about to certify it and stamp your number on it. And you can't wait to put it to work.

Timken® steel has strength where it matters. With our metallurgical and application expertise, Timken ranks as one of the world's foremost manufacturers of seamless alloy mechanical steel tubing. Using some of the cleanest and strongest alloy steels in the world, Timken has built a reputation for working with customers to meet the toughest specs for the widest range of applications. And our latest investments in tubing manufacturing systems are expanding our capabilities even further. Get the process started today by contacting your local Timken steel distributor or sales engineer. Call 1-866-284-6536 or visit timken.com/steel.
