

PT6 Bearing Repair Maximum Availablity Program

Bii
AERO SERVICES BY TIMKEN

AEROSPACE AFTERMARKET

Reliable repairs and total solutions.

Cost Effective. Convenient. Reliable

When the bearings in your PT6 engines need repair, trust Bearing Inspection, Inc.'s new PT6 Bearing Repair Maximum Availability Program to help get you back in the air — efficiently and economically.

How the Maximum Availability Program Works

- Send your PT6 engine bearing in need of repair to our bearing inspection and repair facility. If your bearing does not pass Level II overhaul, instead of returning an unserviceable part, we can provide an overhauled bearing from our exchange pool.
- If you are in critical need of a bearing to support your engine build, we can offer advance ship exchanges.
- We also offer outright purchase of overhauled bearings.
- On select part numbers.

Partner with a Program that Puts You First

- Choice. By investing in a bearing exchange pool, we can help ensure the parts and repair work you need are readily available when you need them.
- Convenience. Save time by working with a single vendor. Let us handle the sourcing and logistics of your repair.
- Confidence. We have the know-how to handle your repair the right way. We've serviced the global aerospace market for more than 55 years.

Trust Bearing Inspection, Inc. for:

- Unsurpassed value.
- Unique alternatives.
- Continuing innovation.
- Integrated logistics.
- Comprehensive services.
