

Non-Metallic Bearing Isolators

for Electric Motors

TIMKEN

Offering the Latest in Sealing Technology

As a global provider of friction management solutions, we supply a variety of industries with the latest in high-performance sealing technology. Not only do we offer a full line of Timken industrial seals for both small and large bore applications, but we've also added Timken bearing isolators for electric motors to our already extensive product offering.

Our non-metallic bearing isolators:

- Provide bearings with an extra layer of protection from contaminants.
- Are easy to install, in the repair shop or in the field.
- Do not require lubrication during operation.
- Do not require installation tools.
- Meets IEEE 841-2001 test standards.

Isolate Your Bearings from Harmful Contamination

Timken non-metallic bearing isolators feature a durable two-piece unitized construction that will not come apart during installation or operation. Made from PolyTetraFluoroEthylene (PTFE) material, these isolators have a wide temperature capability and provide outstanding chemical resistance.

The non-contact design eliminates shaft scoring, drag and heat caused by friction, so there's no need to use lubrication.

Choose between our standard flangeless and step-shaft designs [as shown at the right] to suit your application and operating environment.

Design Parameters

- Operating temperature: -40°F (-40°C) to 400°F (204°C)
- Material: glass-filled PTFE for Iso-Gards and graphite-filled PTFE for Equalizers
- Surface speed: up to 4,500 FPM (22.9 m/s)
- Axial motion: +/-0.015" (0.38 mm)
- Shaft to Bore Misalignment: +/-0.020" (0.5 mm)
- Pressure: Ambient (5 psi for grease-purgeable design)

Electric motor with a Timken non-metallic bearing isolator installed.

Standard Graphite-Filled PTFE

Flangeless Glass-Filled PTFE

Grease Purge Glass-Filled PTFE

Standard Glass-Filled PTFE

TIMKEN

The Timken team applies their know-how to improve the reliability and performance of machinery in diverse markets worldwide. The company designs, makes and markets high-performance mechanical components, including bearings, gears, belts, chain and related mechanical power transmission products and services.

Stronger. Commitment. Stronger. Value. Stronger. Worldwide. Stronger. Together. | Stronger. By Design.
