WHEEL BEARING RETAINER CLIPS

QUALITY COMPONENTS TO DO THE JOB RIGHT THE FIRST TIME

Many Generation 1 bearing designs require a retainer clip, which may need replaced when the bearing is changed. We offer wheel bearing retainer clips for thousands of applications, including the most common makes and models on the road today. See the following pages for a list of applications.

Generation 1 bearing designs

Timken® Wheel Bearing Retainer Clips

- Align with stringent Timken quality standards
- Are engineered to OEM specifications
- Provide a secure fit without scoring the inside of the bore
- Are easy to install with a universal design that reduces notch configurations
- Offer notches set for optimum access using traditional snap ring pliers
- Are cataloged to the year, make and model of the bearing application
