

Demand Performance

Automotive Wheel Bearing Grease from the Friction Experts

ONE GREASE, MULTIPLE USES

Take the guesswork out of choosing the right grease for your disc and drum bearing applications. Use Timken® automotive wheel bearing grease, a premium high-temperature red grease designed for construction, agriculture and automotive applications.

Timken leveraged our knowledge of anti-friction bearings, lubricants and wheel-end systems, to develop this multi-application grease. Timken® automotive wheel bearing grease contains corrosion inhibitors and anti-wear and water-resistant additives for stronger performance in even the most challenging environments.

Beyond excellent wear protection, this high-temperature grease features a lithium complex thickener, which resists softening and provides the mechanical stability required for demanding applications.

STRENGTH INSIDE

- Designed for disc and drum applications
- NLGI GC-LB certified
- NLGI No. 2 lithium complex
- Anti-wear additives
- Corrosion inhibitors
- Water-resistant additives
- Wide operating temperature range -40° F to 300° F (-40° C to 149° C)
- Reusable high-impact container
- Screw-top lid
- 55 lbs. rating offers superior load-carrying capability

| Part # | Description | Case Quantity |
|----------|--------------------|---------------|
| GR224TUB | 425-gram tub | 6 |
| GR224C | 14-ounce cartridge | 10 |

Available in other sizes. See your Timken representative for details.

The Timken team applies their know-how to improve the reliability and performance of machinery in diverse markets worldwide. The company designs, makes and markets high-performance mechanical components, including bearings, gears, belts, chain and related mechanical power transmission products and services.
