

**WARNING** *Failure to observe the following warnings could create a risk of death or serious bodily harm.*

This bearing features a separable inner ring. Care must be taken when handling or installing a fully assembled bearing to prevent the inner ring from accidentally sliding out of the assembly. When using this bearing to replace a unitized bearing it is important to check the design of the installation for positive housing retention on the shaft.

Proper maintenance and handling practices are critical.  
Always follow installation instructions and maintain proper lubrication.
