

The Timken logo is displayed in a bold, orange, sans-serif font in the top right corner of the advertisement. The background of the entire page is a photograph of an offshore oil rig at sunset, with the rig's silhouette reflected in the water.

TIMKEN

MUD PUMPS DESERVE TIMKEN® BEARINGS

Mud pumps work hard in dirty, demanding conditions, dealing with high loads, high temperatures, contamination and vibration. Timken® bearings are designed to work hard, too.

We recommend you install Timken® bearings in all four locations on your pumps to help your equipment get the same high level of quality and performance you've come to expect from Timken.

In fact, Timken engineers have worked closely with mud pump manufacturers for years. We're the supplier of choice for many manufacturers and drilling contractors.

Select Timken bearings for many popular brands of mud pumps for onshore and marine drilling:

- Tapered roller bearings (thrust and axial)
- Cylindrical roller bearings
- Spherical roller bearings

DEPEND ON TIMKEN QUALITY

Timken's design and manufacturing processes provide a high level of quality – bearing after bearing. Our reliability has made Timken a recognized name in oil drilling. The application and maintenance knowledge accumulated over decades is available to you help increase uptime and reduce maintenance costs.

YOU CAN COUNT ON TIMKEN BEARINGS

BROAD PRODUCT CHOICE. For years, drilling engineers have relied on Timken tapered roller bearings for heavy-duty drilling operations. Today, Timken also offers spherical and cylindrical bearings for these applications.

INVENTORY STOCK. We know you need to have replacement parts within a short time, so we have increased our inventory to help provide dependable on-time delivery.

HIGH QUALITY. Timken has literally helped set the industry standards for bearing quality. While our main focus is establishing standards to ensure consistent quality for our own products, we've also played an active part in developing standards for both the American Bearings Manufacturers Association and the International Organization for Standardization (ISO)

VALUE-ADDED PRODUCTS AND SERVICES. With sales engineers located throughout the world, we are close enough to offer customized advice and solutions promptly.

ENGINEERING SERVICES. Our design and research teams work closely with manufacturers of oil drilling equipment. Knowledge and experience are parts of the value our customers receive.

GLOBAL PRESENCE. Timken is a global organization, producing and distributing bearings to customers around the world.

Depend on Timken's extensive bearing products working hard throughout the oil and gas drilling industry:

- Mud Pumps
- Top Drives
- Crown and Traveling Blocks
- Rotary Tables
- Hoist Equipment
- Couplings
- Repair services

Order Timken Mud Pump Sets outfitted with bearings for all four bearing locations in most mud pumps. Get the total value and quality of Timken, and enjoy peace of mind.
