

The Power Behind the Power

The industry brings us its toughest challenges. We deliver unrivaled technical support to make Timken the go-to source for a breadth of highly engineered solutions and technologies.

Discover the latest milestones propelling the industry forward.

Wind energy is
**ON TRACK
TO SUPPLY 10%**
of U.S. electricity by 2020*

**26 MILLION
HOMES**
across 41 states are
powered by wind*

**14 STATES
GENERATE 10%**
or more of their electricity
with wind*

**WIND COSTS
fell by 2/3**
over the last seven years*

\$11 BILLION
in new private investment
to the U.S. economy*

Timken has pioneered many wind bearing technologies in use today—with teams designing innovations to continually improve drivetrain performance.

*Facts from American Wind Energy Association (AWEA).
