Interlube automated lubrication delivery systems and related components help increase plant and vehicle productivity, reduce process downtime and boost profitability for markets including commercial vehicles, construction, mining, and heavy and general industries.
DF
Gravity Feed Lubricators

Lubrication solutions to keep systems running smoothly
DF - Gravity Feed Lubricators

The DF lubricators can drip oil directly on to cams, gears or slideways or brush oil on to chains. These DF lubricators are ideal for small industrial or agricultural applications, when the installation of automatic lubrication is not viable.

Both “DF” versions of the gravity feed lubricator are available as solenoid operated and manually operated and are supplied as standard with:

- Steel mounting plate/lid
- Oil filler cap
- Robust polypropylene reservoir 1/2, 1 or 2 liter
- Fully adjustable drip-feed regulator with sight glass

Solenoid

12V/24V DC electric shut-off valve is designed to be connected to the machine. When the machine is shut off the solenoid will automatically isolate, preventing over lubrication if the machine is not in operation.

Manual

Manual shut-off valve.

The Solenoid version also is available without the drip-feed regulator when multiple drip-feeds are required.
Technical Info

Temp Range: Up to 100°C (212°F)
Reservoir: Polypropylene
Mounting Bracket: Plated Steel
Mounting Holes: 7 mm (0.27 in.) O.D.
Outlet Size: 0.16 in. (4 mm) O.D. compression
Voltage: 12V or 24V DC

Polypropylene has excellent chemical, temperature and fatigue resistance.
