

Torque Limiters

Improve productivity and drive system longevity by eliminating damaging shockloads!

Advantages that Improve the Bottom Line

- **More Uptime:** Reduces fatigue and component breakage due to drive line shock loads through reliable and accurate torque setting.
- **More Productivity:** Maintenance free with tamper resistant torque setting. No adjustment is required at installation or during the wear life of the unit. Most models are available with wear indicators, making it fast and easy to verify remaining torque limiter life.
- **More Predictability:** Reduced, predictable system torque allows equipment to be designed with lower safety factors and more economically.
- **More Versatility:** Compatible with a wide variety of standard drive line configurations and can be adapted to nearly any custom connection, if needed.

Torque Limiter product saves time & money even in the toughest environments

Continuous Miners / Armored Face Conveyors / Feeder Breakers / Longwall Shearers / Shredders / Road Reclaimers / Wood Grinders / Tunnel Boring / Steel Mill Levelers / Tub Grinders / Tire Shredders / Agricultural / Runout Tables / And More!

PT Tech's Torque Limiters

SLQ Series

Torques from 70 lb-ft to 5,500 lb-ft +*
[95 Nm to 7,457 Nm]

UJT Series

Torques from 250 lb-ft to 9,100 lb-ft +*
[339 Nm to 12,338 Nm]

FMD Series

Torques from 1,200 lb-ft to 150,000 lb-ft +*
[1,627 Nm to 203,373 Nm]

**Torques listed are for informational purposes only. Please consult PT Tech Applications Engineering for recommended sizing based on specific application data.*
